Hassan Ali

Aspiring Data Scientist | Machine Learning Engineer

Profile

Data Scientist and Machine Learning enthusiast skilled in Python, machine learning, and web deployment. Built complete ML web applications including House Price Prediction, Diabetes Prediction, and Loan Approval systems. Strong ability in data preprocessing, model training, and deployment. Passionate about building real-world AI solutions.

Experience

Data Science Intern – ARCH Technologies

• Built and evaluated machine learning models

• Performed data cleaning and preprocessing

• Worked with real-world datasets

• Improved ML workflow understanding

Projects

House Price Prediction Web App – Flask, Python, Scikit-learn
Complete ML web application with real-time predictions.

Diabetes Prediction System – Python, ML, Flask
Classification model with deployed web interface.

Loan Approval Prediction – Python, Scikit-learn
ML model with preprocessing and prediction system.

Skills

Python

Machine Learning

Pandas, NumPy

Scikit-learn

MySQL

Flask

GitHub

Education

Intermediate – Pre-Engineering (2024)
